PROFILE

As a motivated third-year Electrical and Electronics Engineering student with a passion for embedded systems and software development, I am eager to secure a summer internship at Mann Truck&Bus to leverage my technical expertise in C programming, microcontroller integration (STM32), and embedded application development. My academic rigor, hands-on internship experience, and drive to solve complex engineering challenges position me to contribute meaningfully to innovative projects while deepening my skills in a dynamic corporate environment.

WORK EXPERIENCE

- IVEO Defence Industries Inc.** July 2024 - August 2024
Intern
- During this internship, I gained hands-on experience in embedded systems and software development. I worked extensively with the C programming language, strengthening my understanding of algorithms and software logic. Additionally, I explored microcontrollers such as STM32, learning how to develop and optimize firmware for embedded applications. This experience enhanced my problem-solving skills and deepened my knowledge of low-level programming and hardware-software integration.

EDUCATION

- Electrical & Electronic Engineer** 2022 - Present
Kırıkkale University
Faculty of Engineering and Architecture Bachelor of Engineering
